Sponsorship Package

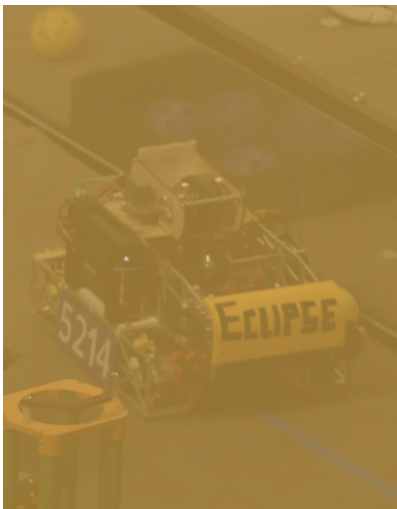

HELIOS.

FTC TEAM 5214

Introduction

Making STEM accessible to all

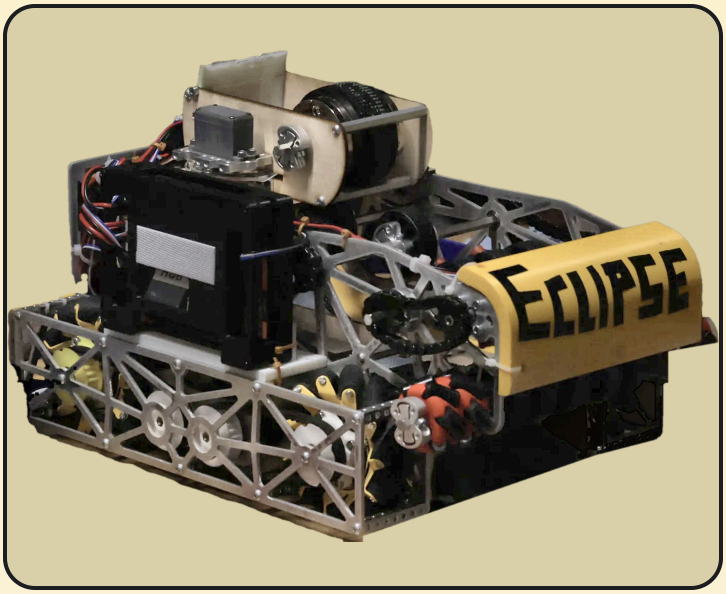

Helios, FTC Team 5214

We are Helios (FTC 5214), a **robotics team** from the East Bay, united by our shared passion for robotics. Driven by a love of building and a goal of **making STEM accessible to all**, our team has run for over 8 years now.

We compete in the **FIRST Tech Challenge (FTC)**, one of the largest global youth robotics competitions with thousands of competing teams. Beyond competing, we run outreach, teach classes, and build kits so more kids can get hands-on with engineering.

Last year's robot with the East Bay League Tournament Innovate Award

Eclipse, our 2026-2027 robot

What We Do

FIRST Tech Challenge

FIRST Tech Challenge students learn to think like engineers. Teams design, build, and program robots to compete in an alliance format against other teams. Robots are built from a reusable platform, powered by android technology, and can be coded using a variety of levels of Java-based programming.

FIRST TECH CHALLENGE

Grades 7-12

Ages 12-18

FIRST Feeder Program

Our school runs **7 FLL teams and 6 FTC teams** that feed into FRC 7419. Students start in FLL, move up to FTC teams like Helios, and then lead on 7419. Many of them come back to mentor the younger teams, so the loop keeps going.

Admissions events. Our program runs **four admissions events** every year with live robot demos. Members answer questions from prospective families and point younger students toward the FLL and FTC teams we mentor.

FLL teams at our school	FTC teams at our school	admissions events every year

Our Community

15+	500+	17
teams mentored	students at camps	FTC and FLL events hosted

Starting Teams

Our program founded **FTC teams 15034, 23836 and 23808** and **FLL teams 64080, 63582, 63583 and 63308**, including **four all-girls teams**. We have helped families start **three more teams** after meeting them at events, and we help Girl Scouts earn **three robotics badges**.

Mentoring 15+ Teams

in the US, Canada, India and Romania

FLL #65169 Terrace Tech Titans
FTC #26586 Argobots
FTC #18466 Mastermindz
FTC #11920 RaD
FTC #14770 Control+Q
FTC #25707 Solar Flare
FTC #6134 Black Frogs
FTC #19071 Smart Cluster

Our belted drivetrain advice helped **Argobots double their OPR**.

Workshops and Events

Camps and workshops with IGNITE Pathways in CAD, Java, Python, Scratch and robotics have reached **500+ students**, about 50 per camp. We have hosted **13 FTC and 4 FLL events** in four years, including four East Bay League meets for 30+ teams in 2023. In summer 2023, we taught kids ages 9 and up Python with Turtle at Dublin Library.

Our Community

IntelliKits

IntelliKits are simple engineering kits we put together so kids can build something themselves, especially where programs and equipment are hard to find.

200+	**Kits given out** 3D-printed physics kits for John Green Elementary School
1	**Partner nonprofit** HOPE Solutions, for kids facing housing insecurity
2	**Activities per event** A programming activity and building model cars

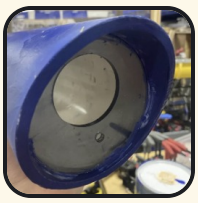

Supporting Kids Who Need It Most

- **Shepherd's Gate**: teaching kids at this Livermore shelter for women and children **every Tuesday since August 2022**
- **HOPE Solutions**: IntelliKits event for kids facing housing insecurity
- **December food drive** for Shepherd's Gate residents

Workshops in India

In summer 2024 we ran a **two-day M-Bot workshop** at government-funded schools and brought books, shoes, uniforms and stationery. We still meet the same students **every two months** as they learn Java and Python.

Coral Cleanup

With **Team 1086 Blue Cheese** from Virginia, we turned retired Reefscape field elements into **birdhouses** for local wildlife and to raise awareness about ocean conservation.

Success and Future

2nd	4-1-0	8+
Current rank	W-L-T record	Years as a team

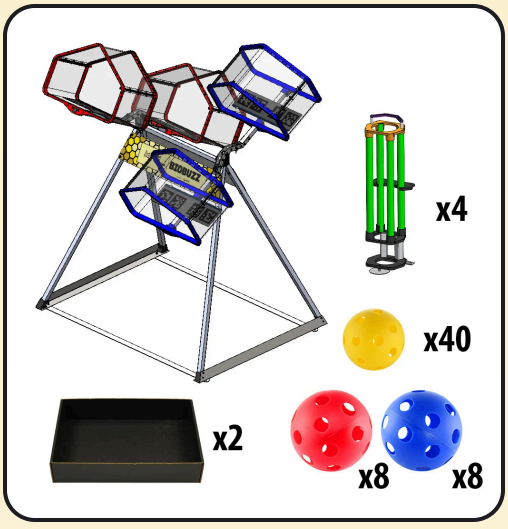

Helios has been a top team in our league. We have **consistently been a top team**, currently ranked 2nd with a 4-1-0 record, and we have won **countless awards**, including the **Innovate, Motivate, and Judges' Choice Awards**.

Where we are going

With your support, we plan to keep growing our outreach.

- **Adaptive technology workshops** for people with autism and Down syndrome, through FCSN
- **e-NABLE prosthetic hands**
- **Starter parts for new FLL and FTC teams** at Title 1 schools in Oakland, who we are already in communication with
- A **practice half field** so our drivers can train more, since the field available to us has limited access

Budget

We are asking sponsors for your generous financial and in-kind support to help us with event registration, robot parts, tools, and outreach supplies. We estimate that it costs about **$6,000** to run Helios for one year.

This season we are also raising money for a **practice half field**, because the field available to us has limited access. Our sponsors' contributions are critical for the success of our robots, our outreach, and the students we serve.

Where your sponsorship goes

- **Robot parts**, mechanical and electrical
- **Event registration** fees
- **Tools and raw materials** for building
- **Outreach supplies**, like the filament we use to 3D print IntelliKits
- A **practice half field** for driver practice

Expenses

The following are our estimated annual expenses:

Category	Expenses
Robot Mechanical	$300
Practice Half Field	$700
Outreach	$500
Robot Electrical	$700
Event Registration	$1,500
Tools and Equipment	$500
Raw Materials	$500
Travel	$1,000
Team Apparel	$300

Total budget **$6,000**
